Family Owned & Operated

December 2024

FAMILY ESTATE

While on a recent trip, I saw a coaster with the saying “Many Men go fishing all of their lives without knowing that it is not fish they are after.” Written by Henry David Thorneau back in the 1800’s. Some concluded that although we chase after what our minds want and get it (the fish) we are, after left unsatisfied and begin to question whether or not it was worth it at all (the journey). I contemplated this statement. What it meant to me, is as follows. When I go on trips, whether it’s fishing, golfing or hunting, I am in pursuit of the moment, the time spent with the family, friends, the dog and the outdoors. The fish, the pheasant, the hole in one are the incidents. I have realized I don’t even like golfing, I only like having a few beers on the golf course with my Family and Friends, the game means nothing. I remember my friend’s significant other telling us one day when we were heading out golfing, “You guys are idiots, don’t you know it’s going to rain?” I said “You really think we are going golfing? I suppose you actually think we go hunting and fishing as well?” In disgust she said, “I should’ve known”. How could she, unless she was one of the crew and able to understand that certain camaraderie created from those road trips, seeing the country, spending time listening to music, laughing, telling stories, going out for dinner, maybe catching that fish, shooting that pheasant or maybe that great golf shot, are the small pieces of my puzzle that let me know how loud and clear it’s definitely *not the fish* I am after at all. Time passes, but memories last forever.

In most **Family Estates**, I find one sibling steps up to the plate and takes charge. Usually by necessity, not desire, as they are putting themselves in a tough spot. Someone in the family either immediate or by marriage is not going to agree on how Jr is trying to handle the **Estate**. If it is left up to the group it seems more often than not nothing gets resolved. So the decisions have to be made to sell or buy each other out and at what price! Usually a controversy that can create some long term wounds! Off the farm family members don’t usually understand the Ag Industry or all the intricacies that go along with agriculture, which can also cause major hurdles. Courtrooms! Believe me, I’ve been in more than one court room on Ag related suits and most of the court systems don’t have a clue what the Ag Industry is made of, so you sure don’t want to go there, as there will be no winner other than the court system! Before you get in this hornets nest, give us a call and we will meet the group at your office, conference room, shop, or kitchen table to give you some straight answers and help you wade through the project without any hard feelings while we are resolving the specific items within your **Family Estate**.

GETTING THE IMPORTANT THINGS DONE

Nearly one hundred years ago, a management consultant presented the following ‘revolutionary’ idea to an owner of a small Pennsylvania corporation. To get things done: Start by writing down the five most important things you want to do tomorrow. Rank them one to five in the order of their importance. Put the list away and get a good night’s sleep. The next day, get out your list and begin working on the number one ranked job. Don’t worry about the other four, you are working on the most important thing to do that day. When you finish your number one job move on to number two. If for some reason you can’t complete your number one project, set it aside and go to work on number two but come back to number one as soon as you find you can make more progress on your number one (most important) job. As you go through the day, check off your completed jobs. At the end of the day, make your list for tomorrow. It’s been proven over the past one hundred years that if you can’t get things done with this method, you can’t get things done by any other method. **The secret is that it is not important how much you get done, it’s important how much of the important stuff you get done.**

Weather Almanac

by Meteorologist Frank Watson

Weather projections, features and facts created by Bruce Watson for our Weather Almanac are presented as scientific guidelines as to what we might expect over a large area of the Midwest, as well as our part of the state and general service area. The "Normals" appearing on the back page are provided for the particular counties we serve and reflect the average high and low temperatures, plus average amount of sunshine and precipitation experienced in weeks to month in the area over the past 170 years. Frank Watson utilizes a model that Bruce Watson specially designed, based on weather observations that much more clearly represent our local climate than do shorter, 20-year National Weather Service averages. These figures draw on the long history of systematic observations begun by the U.S. Army in 1817.

Full Moon

**December
15th**

Cold Moon

December Weather Outlook

Summary

Temperatures are favored to average near normal. Precipitation is expected to total below normal. Expect a mostly sunny and dry opening week of December, 1-6. A rain to snow system is favored on December 7-8. Look for some sun on December 9-10. A large precipitation event, rain or snow, is possible sometime during December 11-15. Mostly sunny and colder from December 16-19. Clouds and light snows are favored from December 20-24. Mostly sunny on December 25-26. Clouds will be on the increase with snow possible from December 27-30. Some sun on December 31.

Dates to Remember:

Winter Solstice Saturday, December 21. 3:21 AM.

Morning Planets: Mercury & Mars

Evening Planets: Venus, Saturn, Uranus & Neptune

December Astronomy ~ It's in the Stars

As we head into our darkest month, there will be good viewings of the planets in the early morning and evening hours. Winter Solstice Saturday, December 21. 3:21 AM.

Mercury will come into view midmonth low in the eastern sky 90 minutes before sunrise. Mercury will be to the left of the moon.

Venus will be in the southwest sky at sunset.

Mars rises in the evening hours after sunset and will be visible during the overnight hours.

Jupiter rises in the evening hours and is visible during the overnight hours. The moon and Jupiter rise together on Saturday, December 14. Jupiter rises before Mars throughout the month by a couple hours.

The last Quarter moon is on Sunday, December 22.

Saturn will be visible in the evening hours after sunset in the southern sky, setting before the end of the day. Saturn sets with the first quarter moon on Saturday and Sunday, December 7-8.

Future Weather Outlook

January expect warmer than normal temperatures with above normal precipitation.

Precipitation is expected to total above normal. Favored dates for heavier precipitation center on January 1, 2, 3, 14, 15, 16, 18, 19, 24, 25, 28 and 30

February outlook favors colder than normal temperatures and above normal precipitation.

March expect above normal temperatures with above normal precipitation.

~ December Events ~

December 1 is the First Sunday of Advent, marking the beginning of the Advent season.

December 7 is National Pearl Harbor Remembrance Day.

Look skyward on the night of December 13 after 9 P.M. for a chance to catch a glimpse of the Geminid meteors. The Geminid meteor shower is the most active shower of the year.

December 17 is Wright Brothers Day.

December 21 Winter Solstice—the astronomical day when the Earth is farthest away from the Sun.

December 25 is Christmas Day

December 26: National Candy Cane Day

December 31 New Year's Eve
